

## CLAIMS

I claim:

1. A package decoration with pop-up display comprising:
  - a foldable panel sized to overlie a portion of a side of a package,
  - a pop-up display affixed to the panel and formed of one or more sheets that are configured to fold into a generally flat and compact configuration between portions of the foldable panel when the foldable panel is folded and to expand to form a three dimensional display.
2. The package decoration of claim 1 further comprising a ribbon overlying the panel and extending from the panel to extending around at least a portion of the package.
3. The package decoration of claim 1 wherein the panel includes a greeting card section displaying a greeting.
4. The package decoration of claim 1 wherein the popup display forms a dimensional display by joined panels.
5. The package decoration of claim 2 wherein the popup display forms a dimensional display by joined panels.
6. The package decoration of claim 1 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object.
7. The package decoration of claim 2 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object.

8. The package decoration of claim 1 wherein the popup display forms a dimensional display by forming a panel to generally conform to at least a portion of the outer surface of a represented three dimensional object and by one or more joined panels.
